

I am on the road a LOT. I use the services of XM satellite radio for news, weather, and traffic reports on a daily basis. It is extremely easy for me to find what I need. I always know where it is and the feed is not only live but real time. If NAB petition 04-160 is approved I fear that I would lose this valuable asset. I do not feel that alternatives will provide me with anywhere near the level of support and ease of use I now have. I urge you to deny this petition.

Thank you
